

15A NCAC 02S .0504 CONTAMINATED SITE CHARACTERIZATION

(a) A site assessment shall describe:

- (1) The source, types and levels of contamination at the site;
- (2) Any immediate actions required to abate any imminent hazard to public health, safety, or welfare or the environment;
- (3) All receptors and exposure pathways;
- (4) The horizontal and vertical extent of soil and groundwater contamination;
- (5) The geology and hydrogeology of the contaminated site, and features influencing the movement, chemical, and physical character of the chemicals of concern;
- (6) The current and anticipated uses of property and groundwater at the site.

(b) The Division shall determine the scope of any assessment necessary to adequately characterize a site.
