

15A NCAC 02U .0802 RESIDUALS MANAGEMENT

(a) A Residuals Management Plan shall be maintained for all reclaimed water and closed-loop recycle systems that generate residuals. The plan shall include the following:

- (1) an explanation as to how the residuals will be collected, handled, processed, stored, and disposed;
- (2) an evaluation of the residuals storage requirements for the treatment facility, based upon the maximum anticipated residuals production rate and the ability to remove residuals;
- (3) a permit for residuals management or a written commitment to the permittee of a Department-approved residuals management program accepting the residuals that demonstrates that the approved program has capacity to accept the residuals or that an application for approval has been submitted; and
- (4) if oil, grease, grit, or screenings removal and collection is a designed unit process, an explanation as to how these materials will be collected, handled, processed, stored, and disposed.

(b) The permittee shall maintain a record of all residuals removed from the facility.

*History Note: Authority G.S. 143-215.1; 143-215.3(a);
Eff. June 18, 2011;
