

21 NCAC 50 .0511 FUEL PIPING

The contracting or installation of fuel piping extending from an approved fuel source at or near the premises, to a point within the premises, requires either Plumbing, Heating Group 1, Heating Group 2, Heating Group 3, or Fuel Piping license regardless the nature of the system, equipment or appliance served. The term fuel refers to flammable gas, flammable liquefied gas, or flammable liquid as those terms are defined in Volume V of the North Carolina Building Code, and to combustible liquid so defined when used in a non-residential application. This provision does not alter the restriction of Class II license to single family detached residential dwellings.
