SECTION .0100 – GENERAL PROVISIONS

15A NCAC 01C .0101 STATEMENT OF PURPOSE, POLICY, AND SCOPE

- (a) The purpose of the rules in this Subchapter is to establish procedures within the Department of Environmental Quality (DEQ) related to the North Carolina Environmental Policy Act (NCEPA).
- (b) Environmental documents shall be available to public officials and citizens before decisions are made and before actions are taken. The information shall be reliable and sufficient to allow selection among alternatives.
- (c) The Secretary is the "responsible state official" for DEQ. The Secretary may delegate responsibility for the implementation of the NCEPA to staff.
- (d) The provisions of the rules in this Subchapter, the Department of Administration's rules (01 NCAC 25), and the NCEPA shall be read together as a whole in order to comply with the spirit and letter of the law.
- (e) These Rules establish minimum criteria to determine when preparation of an environmental document is not required when DEQ is the state project agency.

15A NCAC 01C .0103 DEFINITIONS

The definition of any word or phrase used in rules of this Subchapter is the same as given in G.S. 113A-9. The following words and phrases have the following meaning.

- (1) "Channel Disturbance" means activities that permanently remove or degrade the natural functions of the stream such as culverting, relocation, channelization, or streambank stabilization methods including gabions, rip rap, or similar hard structures.
- (2) "Cumulative Impacts" means environmental impacts resulting from incremental effects of an activity when added to other past, present, and reasonably foreseeable future activities regardless of what entities undertake such other actions. Cumulative impacts are the reasonably foreseeable impacts from individually minor but collectively significant activities.
- (3) "Direct Impacts" mean environmental impacts which are caused by an activity and occurring at the same time and place.
- (4) "Disposal" means the discharge, deposit, injection, dumping, spilling, leaking, or placing of any waste into or on any land or water so that the waste or any constituent part of the waste may enter the environment or be emitted into the air or discharged into any waters, including groundwaters, or beneath or on the surface of the land.
- (5) "Ecosystem" means all the interrelated organisms and their environment within a defined area.
- (6) "Forestry Management Plan" means a document that guides the practical and sustainable application of biological, physical, quantitative, managerial, economic, social, and policy principles to the regeneration, management, utilization, and conservation of forests to meet specified goals, and objectives while maintaining the productivity of the forest. Forest management includes management for aesthetics, fish, recreation, urban values, water, wilderness, wildlife, wood products and other forest resource values.
- (7) "Hazardous Waste" means a waste, or combination of wastes, in any state or form including gas, liquid, or solid, that because of its quantity, concentration, or physical, chemical, or infectious characteristics may cause or contribute to an increase in mortality or an increase in irreversible or

- incapacitating reversible illness, or pose a present or potential hazard to human health or the environment when improperly treated, stored, transported, disposed of, or otherwise managed.
- (8) "High Quality Waters (HQW)" has the same meaning as in 15A NCAC 02B .0224.
 - (9) "Inlet" means a waterway between islands connecting a lagoon, estuary, sound, or similar water body with the ocean.
 - (10) "Instream Flow" means the amount of water needed in a stream to adequately provide for downstream uses occurring within the stream channel, including some or all of the following: aquatic habitat, recreation, wetlands maintenance, navigation, hydropower, riparian vegetation, and water quality.
 - (11) "Land-Disturbing Activity" has the same meaning as in G.S. 113A-52.
 - (12) "Lead Division" means the division within DEQ that has been appointed by the Secretary, pursuant to 15A NCAC 01C .0105, to have primary responsibility for preparation of an environmental document when DEQ is the state project agency.
 - (13) "Perennial Stream" means a channel that contains water year round during a year of normal rainfall with the aquatic bed located below the water table for most of the year. Groundwater is the primary source of water for a perennial stream, but it also carries stormwater runoff. A perennial stream exhibits the typical biological, hydrological, and physical characteristics commonly associated with the continuous conveyance of water.
 - (14) "Prime agricultural and forest land" means lands that possess the best combination of physical and chemical characteristics for producing food, feed, fiber (including forest products), forage, oilseed, and other agricultural products (including livestock), without intolerable soil erosion. This does not apply to lands that are already in or committed to development projects such as water impoundment, transportation, and urban development.
 - (15) "Reclaimed Water" has the same meaning as in 15A NCAC 02U .0103.
 - (16) "Resource" means any natural product or value, not necessarily economic, but including trees, minerals, wildlife, clean air and water, fisheries, ecosystems, landscapes, and open space.
 - (17) "River Basin" means the watershed of a major river system.
 - (18) "Secondary Impacts" mean indirect impacts caused by and resulting from a specific activity that occur later in time or further removed in distance than direct impacts, but are reasonably foreseeable. Indirect impacts may include growth inducing effects and other effects related to induced changes in the pattern of land use, population density or growth rate, and related effects on air, water, and other natural systems, including ecosystems.
 - (19) "Secretary" means the Secretary of DEQ.
 - (20) "State Project Agency" means the state department or council of state agency that has been designated pursuant to 01 NCAC 25 .0210(a) for ensuring compliance with NCEPA.
 - (21) "Stream Enhancement" means the process of implementing stream rehabilitation practices in order to improve water quality or ecological function. These practices are typically conducted on the stream bank or in the flood prone area. Enhancement activities may also include the placement of in-stream habitat structures.
 - (22) "Stream Restoration" means the process of converting an unstable, altered, or degraded stream corridor, including adjacent riparian zone and flood prone areas to its natural or referenced, stable conditions considering recent and future watershed conditions. This process also includes restoring the geomorphic dimension, pattern, and profile as well as biological and chemical integrity, including transport of water and sediment produced by the stream's watershed in order to achieve dynamic equilibrium.
 - (23) "Total Design Withdrawal" means the pumping rate at which water can be removed from the contributing stream. It is the sum of any pre-existing withdrawal capacity plus any withdrawal increase.
 - (24) "Wetlands" has the same meaning as in 15A NCAC 02B .0202.

15A NCAC 01C .0104 AGENCY COMPLIANCE

- (a) DEQ shall interpret the provisions of the NCEPA as a supplement to its existing authority and as a mandate to view its policies and programs in the light of the NCEPA's comprehensive environmental objectives.
- (b) As part of making a decision on a project for which an environmental document has been prepared, DEQ shall review the document and incorporate it as part of continuing deliberations. The resulting decision shall be made after weighing all of the impacts and mitigation measures presented in the environmental document, which shall become part of the decision-making record.

15A NCAC 01C .0105 LEAD AND COOPERATING DIVISIONS RESPONSIBILITY

Where DEQ is the state project agency and more than one of its divisions must issue a permit or other authorization for the project requiring review under NCEPA, the Secretary shall appoint a lead division to be responsible for preparation of the environmental document. The lead and cooperating divisions' responsibilities shall be established by the Secretary.

15A NCAC 01C .0106 SCOPING AND HEARINGS

When DEQ is the state project agency, DEQ shall utilize scoping and hearing processes to the extent appropriate to the complexity, potential for environmental effects, and level of expressed interest associated with the proposed action. Scoping and hearing processes are public processes designed to determine the types of environmental issues to be addressed in environmental documents. They are open processes intended to obtain the view of other agencies and the public in order for state agencies to make informed decisions.

History Note: Authority G.S. 113A-2; 113A-4; 113A-6; 143B-10;
Eff. April 1, 2003;

15A NCAC 01C .0107 LIMITATION ON ACTIONS DURING NCEPA PROCESS

- (a) If an environmental document is required under NCEPA, DEQ shall not undertake an action until the environmental document for that action is final.
- (b) If DEQ is considering a proposed action for which an environmental document is to be or is being prepared under NCEPA, DEQ shall promptly notify the applicant that DEQ cannot take final action until the environmental document is completed and available for use as a decision-making tool. The notification shall be consistent with the statutory and regulatory requirements of DEQ and may be in the form of a notification that the application is incomplete.
- (c) When a program within DEQ decides that a proposed action, for which other DEQ actions are pending or have been taken, requires environmental documentation, then that program shall promptly notify all the other relevant DEQ programs of the decision.
- (d) When statutory and regulatory requirements prevent DEQ from suspending action, DEQ shall deny any action for which it determines an environmental document is required under NCEPA but not yet available as a decision-making tool.

15A NCAC 01C .0108 EMERGENCIES

- (a) If there is an immediate threat to public health, safety, and welfare, DEQ may take otherwise lawful actions with potential environmental effects without preparing an environmental document. In those emergency circumstances, DEQ shall limit actions to those necessary to control and mitigate for the immediate threat to the public health, safety, and welfare.

(b) DEQ may prepare and maintain environmental documents for repetitive emergency programs affecting the public to review the scope of involved activities, identify specific effects to be expected, and identify mitigation measures that can be employed.

15A NCAC 01C .0109 PREPARATION OF ENVIRONMENTAL DOCUMENTS

(a) When DEQ is the state project agency, DEQ may request information from an applicant to prepare an environmental document. DEQ shall independently evaluate the information provided and shall be responsible for its accuracy.

(b) When DEQ is the state project agency, an environmental document may be prepared by a consultant, including the applicant for the action's consultant. If DEQ allows an applicant for the action to prepare an environmental document, DEQ shall furnish guidance and participate in the preparation, and take responsibility for its scope, objectivity, content, and accuracy.

(c) The Environmental Assessment Guidance Document available through the State Clearinghouse provides guidance in preparing environmental documents.

(d) When DEQ is the state project agency, the content and finalization of an environmental document shall comply with NCEPA, DEQ's rules, and the Department of Administration's rules (01 NCAC 25).

15A NCAC 01C .0206 WHEN TO PREPARE ENVIRONMENTAL DOCUMENTS

(a) When an environmental document is required under NCEPA and DEQ is the state project agency, DEQ shall prepare an environmental document unless the action falls below the minimum criteria set forth in Section .0400 of this Subchapter. As described in 15A NCAC 01C .0306, the Secretary may require preparation of an environmental document that would otherwise not be required through application of DEQ's minimum criteria.

(b) An environmental assessment is not necessary if DEQ has decided to prepare an environmental impact statement.

(c) DEQ shall ensure that the activity that is the subject of the environmental document is properly defined. Closely connected activities should be reviewed together. Closely connected activities include:

- (1) activities that automatically trigger other activities that may require environmental impact statements;
- (2) activities that cannot or will not proceed unless other activities occur either previously or simultaneously; and

- (3) activities that are interdependent parts of a larger plan of development and depend on the larger plan of development for justification.

15A NCAC 01C .0207 INCORPORATION BY REFERENCE

(a) DEQ shall incorporate material into environmental documents by reference to cut down on bulk without impeding DEQ and public reviews of the action. The incorporated material shall be cited in the document and its contents briefly described.

(b) Incorporated-by-reference material shall be made available by the applicant for inspection by reviewers and potentially interested persons within the time allowed for comment.

15A NCAC 01C .0208 INCOMPLETE OR UNAVAILABLE INFORMATION

(a) Where DEQ is evaluating effects upon the environment in an environmental document and there are gaps in relevant information or scientific uncertainty, DEQ shall make clear that such information is lacking or that uncertainty exists.

(b) In considering whether unavailable information should be sought and included in the environmental document, DEQ shall consider whether the information can be obtained, how long it would take to obtain that information, and the significance of the information to understanding the effects of the proposed action or alternative. If, after considering those factors, DEQ proceeds with preparation of the environmental document without the information, DEQ shall include within the environmental document:

- (1) a statement that such information is incomplete or unavailable;
- (2) a statement of the relevance of the incomplete or unavailable information to evaluating reasonably foreseeable significant adverse impacts on the human environment;
- (3) a summary of existing credible scientific evidence which is relevant to evaluating the reasonably foreseeable significant adverse impacts on the human environment; and
- (4) DEQ's evaluation of such impacts based upon theoretical approaches or research methods generally accepted in the scientific community.

(c) For the purposes of this Section, "reasonably foreseeable" includes impacts which have catastrophic consequences, even if their probability of occurrence is low, provided that the analysis of the impacts is supported by credible scientific evidence, is not based on pure conjecture, and is within the rule of reason.

- (1) Construction of facilities or infrastructures on lands and waters owned or managed by DEQ.
- (2) Demolition of or additions, rehabilitation, and or renovations to a structure listed in the National Register of Historic Places or more than 50 years of age except where agreement exists with the Department of Natural and Cultural Resources that the structure lacks architectural or historical significance.

15A NCAC 01C .0306 ACTIVITIES OF A SPECIAL NATURE

The Secretary may require preparation of an environmental document that would otherwise not be required through application of DEQ's minimum criteria if the Secretary determines:

- (1) the proposed activity may have a potential for significant adverse effects on wetlands; surface waters such as rivers, streams, and estuaries; parklands; game lands; prime agricultural or forest lands; or areas of local, state, or federally recognized scenic, recreational, archaeological, ecological, scientific research, or historical value, including secondary impacts; or would threaten a species identified on the Department of Interior's or the State's threatened and endangered species lists;
- (2) the proposed activity could cause changes in industrial, commercial, residential, agricultural, or silvicultural land use concentrations or distributions which would be expected to create adverse water quality, instream flow, air quality, or ground water impacts; or affect long-term recreational benefits, fish, wildlife, or their natural habitats;
- (3) the proposed activity has secondary impacts, or is part of cumulative impacts, not generally covered in the approval process for the state action, and that may result in a potential risk to human health or the environment; or
- (4) the proposed activity is of such an unusual nature or has such widespread implications that a concern for its environmental effects has been identified by DEQ or expressed to DEQ.

15A NCAC 01C .0405 PURPOSE OF THE MINIMUM CRITERIA THRESHOLDS

If NCEPA requires preparation of an environmental document and DEQ is the state project agency, the minimum criteria set forth in this Section determine when preparation of an environmental document is not required because the action or class of actions have no significant long-term impact on the environment. An activity shall satisfy each applicable minimum criteria threshold to maintain this status. As set out in Rule .0306 of this Subchapter, the Secretary may require preparation of an environmental document that would otherwise not be required through application of DEQ's minimum criteria.

15A NCAC 01T .0402 PROJECT ELIGIBILITY

The following types of water resource development projects are eligible for state cost-sharing by the Department of Environment, Health, and Natural Resources (department):

- (1) general navigation improvement;
- (2) recreational navigation improvement;
- (3) water management (flood control and drainage);
- (4) stream restoration (clearing and snagging and limited channel excavation);
- (5) beach protection; and
- (6) land acquisition and facility development for water-based recreation sites.

Projects planned and constructed by a federal agency with a local cost-share and projects without federal assistance are both eligible for state financial assistance. Small watershed projects of the U.S. Soil Conservation Service reviewed by the North Carolina Soil and Water Conservation Commission are not eligible for cost-sharing under this Section. Questions about eligibility should be directed to the Division of Water Resources, Department of Environment, Health, and Natural Resources, P.O. Box 27687, Raleigh, N. C. 27611, (919) 733-4064.

15A NCAC 01T .0403 PROJECT COST-SHARING AMOUNTS

The department may provide state funds in amounts not to exceed the percentages stated in G.S. 143-215.71 of either the non-federal costs (in the case of a federal agency project) or the total costs (in the case of a project not receiving federal funds).

In the case of a local government water resources project where the department thinks a preliminary feasibility study or engineering study is necessary to more accurately determine project costs and/or benefits and/or scale of development, the department may provide up to 50 percent state funding of such studies. The sponsoring local government would provide the remainder of the funds necessary.

In the case where projects provide broad regional benefits, or where assignment of non-federal responsibilities to local government is not appropriate in the opinion of the department, the department may assume sponsorship on behalf of the state and may pay up to 100 percent of the total (or the non-federal share of the cost) of planning, construction, or operation of said water resources project.
